**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 11 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No. 3,812,402 to Garth.

Regarding claim 1, Garth teaches a semiconductor package (Figs. 1 – 3) comprising:

a semiconductor die (10) having an IC;  
a substrate (11) having a die side coupled to the IC; and  
a plurality of multi-signal bus bars (15, 16) electrically coupled to a socket side (22) of the substrate, the bus bars to enable I/O signals to be transported between the substrate and a socket.

Regarding claim 11, Garth teaches a semiconductor package, wherein the bus bars have a substantially planar overall geometry.

Regarding claim 13, Garth teaches a semiconductor package, wherein the IC is a computer processor.

***Allowable Subject Matter***

3. Claims 14 – 25 are allowed.

Art Unit: 2811

4. Claims 2 – 10 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

5. Applicant's arguments with respect to claims 1, 11 and 13 have been considered but are moot in view of the new ground(s) of rejection.
